

Chapter A More on Addition and Subtraction

Worksheet 1 Addition

- 1 Fill in the missing numbers and find the sum in 2 ways.

$$\square + \square = \square$$

$$\square + \square = \square$$

- 2 Write the addition equations using these numbers in 2 ways.

19

31

$$\square + \square = \square$$

$$\square + \square = \square$$

- 3 Fill in the missing numbers and find the sum.

(a) $2 + 13 = 13 + \square$
 $= \square$

(b) $35 + 44 = \square + 35$
 $= \square$

(c) $100 + \square = 60 + 100$
 $= \square$

(d) $\square + 32 = 32 + 58$
 $= \square$

- 4 Fill in the missing numbers and show 3 ways to get the sum.

$$\boxed{} + \boxed{} + \boxed{} = \boxed{}$$

$$\boxed{} + \boxed{} + \boxed{} = \boxed{}$$

$$\boxed{} + \boxed{} + \boxed{} = \boxed{}$$

- 5 Find the sum of the underlined numbers and add it to the other number.

$$\underline{20} + \underline{130} + \underline{80} = 130 + \boxed{} = \boxed{}$$

$$\underline{20} + \underline{130} + 80 = 80 + \boxed{} = \boxed{}$$

$$20 + \underline{130} + \underline{80} = 20 + \boxed{} = \boxed{}$$

- 6 Tick (✓) the equation that is easiest to add.
The underlined numbers are the ones added first.

$$\underline{93} + \underline{66} + 107 = 266 \quad \boxed{}$$

$$93 + \underline{66} + \underline{107} = 266 \quad \boxed{}$$

$$\underline{93} + 66 + \underline{107} = 266 \quad \boxed{}$$

Worksheet 2 Split Method

- 1 Add 35 and 23 using the Split Method.

Add the tens.

$$\boxed{} + \boxed{} = \boxed{}$$

Add the ones.

$$\boxed{} + \boxed{} = \boxed{}$$

Find the total.

$$\boxed{} + \boxed{} = \boxed{}$$

- 2 Add 510 and 340 using the Split Method.

Add the hundreds.

$$\boxed{} + \boxed{} = \boxed{}$$

Add the tens.

$$\boxed{} + \boxed{} = \boxed{}$$

Find the total.

$$\boxed{} + \boxed{} = \boxed{}$$

- 3 Find the answer.

(a) $56 + 36 = \boxed{}$

(b) $380 + 410 = \boxed{}$

- 4 Subtract 27 from 78 using the Split Method.

Subtract the tens.

$$\square - \square = \square$$

Subtract the ones.

$$\square - \square = \square$$

Find the total.

$$\square + \square = \square$$

- 5 Subtract 230 from 660 using the Split Method.

Subtract the hundreds.

$$\square - \square = \square$$

Subtract the tens.

$$\square - \square = \square$$

Find the total.

$$\square + \square = \square$$

- 6 Find the answer.

(a) $88 - 45 = \square$

(b) $950 - 140 = \square$

Worksheet 3 Finding the Value of an Unknown Object

- 1 What does the  represent?

$$33 + \text{strawberry} = 90$$

$$90 - \boxed{} = \boxed{}$$

The  represents .

- 2 Find the value each present represents.

(a) $14 + \text{present} = 50$

$$\text{present} = \boxed{}$$

(b) $\text{present} + 85 = 130$

$$\text{present} = \boxed{}$$

(c) $\text{present} + 270 = 690$

$$\text{present} = \boxed{}$$

3 What does the  represent?

$$94 - \text{orange} = 24$$

$$94 - \square = \square$$

The  represents .

4 Find the value each marble represents.

(a) $59 - \text{marble} = 14$

$$\text{marble} = \square$$

(b) $164 - \text{marble} = 80$

$$\text{marble} = \square$$

(c) $470 - \text{marble} = 230$

$$\text{marble} = \square$$
