

Progress Tracker – How-to

Putting it together

1. Print out both sides of your progress tracker on separate pieces of paper.
2. Cut off the right hand, white edge on the first sheet.
3. Lay your first sheet slightly over your second sheet by matching up the colored line and outer edges.
4. Use three, one-inch pieces of tape to connect the pages on the back side.

Using it

1. Make sure you've printed out the progress tracker for your student's Dimensions Math level.
2. Hang it on the wall, display it on your desk, or fold it into your book.
3. Every time your student completes a lesson, have them mark off an icon. They can color it in, place a sticker on it, or find another way to get creative!
