

Foundations For Success: Dimensions Math® PK–5

We want you to have great success with the Dimensions Math® curriculum. These on-demand professional development videos introduce you to the program and offer guidance on how to implement it in your classroom. First, watch the “What’s in the Box?” video for the grade level you teach. Then, watch videos 2–3 to round out your knowledge.

Video	Description
Video 1A What’s in the Box? Grades 1–5 (~20 minutes)	• Dimensions Math series overview • How to use the Teacher’s Guides • Lesson flow • Textbooks • Workbooks • Tests
Video 1B What’s in the Box? Grade K (~25 minutes)	• Dimensions Math series overview • How to use the Teacher’s Guides • Lessons and Activities • Tests
Video 1C What’s in the Box? Grade PK (~15 minutes)	• Dimensions Math series overview • How to use the Teacher’s Guides • Lesson flow • Whole group and small group activities • Textbooks and Workbooks

Video	Description
Video 3 What is Singapore Math? (~20 minutes)	• The origins of Singapore math • How Singapore and U.S. students score on international tests • Singapore math and Dimensions Math pedagogy • Four major underlying theories of Singapore math
Video 4 Planning Lessons for Grades 1–5 (~40 minutes)	• In-depth lesson planning using real lessons from Grades 1A and 5A • See how all components of the program (Teacher’s Guide, Textbook, Workbook) come together to effectively teach concepts
