Contents

Chapter 9	**Decimals**	**1**
	Tenths	2
	Representing Decimals in Tenths on a Number Line	6
	Hundredths	10
	Representing Decimals in Hundredths on a Number Line	14
	Thousandths	16
	Representing Decimals in Thousandths on a Number Line	20
	Comparing and Ordering Decimals	21
	Number Patterns in Decimals	25
	Rounding to the Nearest Whole Number	28
	Rounding to 1 or 2 Decimal Places	31
	Expressing Fractions as Decimals	34
	Expressing Decimals as Fractions	36
	Mathematics Around Us	37
	Thinking Aloud	38
	What Have I Learnt?	39
Chapter 10	**Four Operations of Decimals**	**41**
	Addition of Decimals	42
	Subtraction of Decimals	47
	Word Problems	52
	Multiplication of Decimals	54
	Division of Decimals	58
	Dividing Numbers and Correcting Answers to 1 or 2 Decimal Places	63
	Word Problems	65
	Mathematics Around Us	68
	Thinking Aloud	68
	What Have I Learnt?	69

Chapter 11	**Pie Charts**	**71**
	Interpreting Data in Pie Charts I	72
	Interpreting Data in Pie Charts II	79
	Mathematics Around Us	83
	Thinking Aloud	84
	What Have I Learnt?	86
Chapter 12	**Area and Perimeter**	**87**
	Finding the Lengths of Squares	88
	Finding Unknown Sides of Rectangles	90
	Area and perimeter of Composite Figures	92
	Mathematics Around Us	100
	Thinking Aloud	100
	What Have I Learnt?	101
Chapter 13	**Nets**	**103**
	Prisms and Pyramids	104
	Drawing Geometric Figures	108
	Nets of Geometric Figures	110
	Mathematics Around Us	116
	Thinking Aloud	116
	What Have I Learnt?	117
Chapter 14	**Symmetry**	**119**
	Symmetric Figures and Lines of Symmetry	120
	Completing Symmetric Figures on Square Grids	125
	Mathematics Around Us	128
	Thinking Aloud	129
	What Have I Learnt?	130

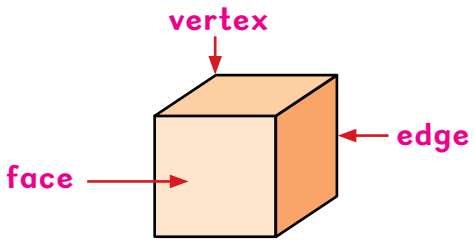

13 Nets

What 3D shape will I form with this?
These are pyramids.
This is a prism.
What 3D shapes can you find on the table?

Happy Birthday

Prisms and Pyramids

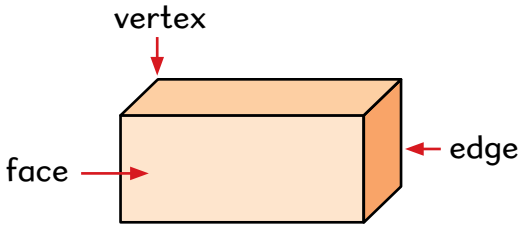

Recall

These are properties of 3-dimensional shapes and solids.

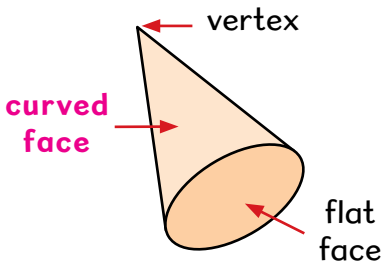

Cube

A cube has ☐ flat faces,
☐ vertices and ☐ edges.

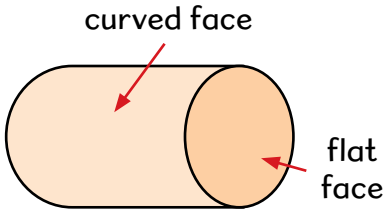

Cuboid

A cuboid has ☐ flat faces,
☐ vertices and ☐ edges.

Cone

A cone has ☐ flat face,
☐ vertex and ☐ curved face.

Cylinder

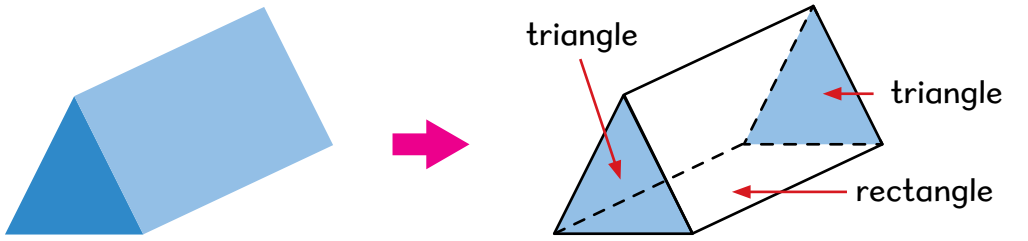

A cylinder has ☐ flat faces
and ☐ curved face.

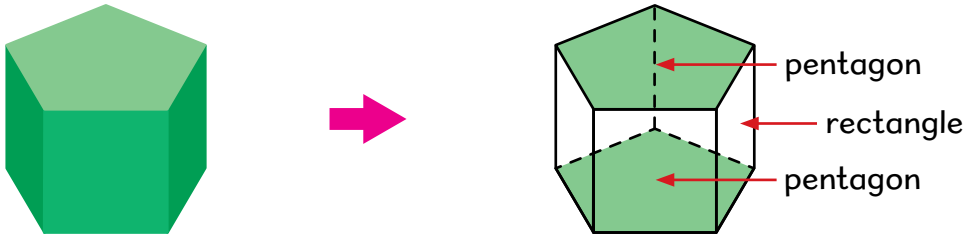

The 3-dimensional shapes and solids are also known as **geometric figures**.

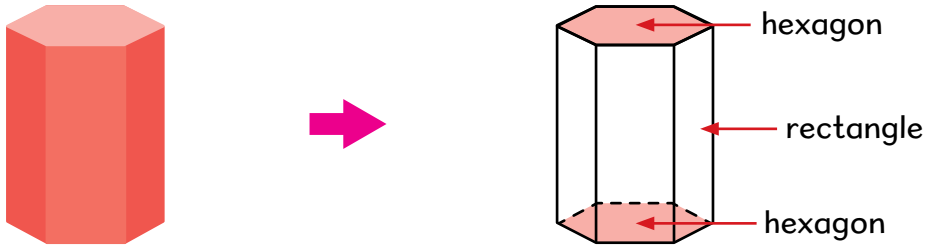

Go to PB 4B Practice 1

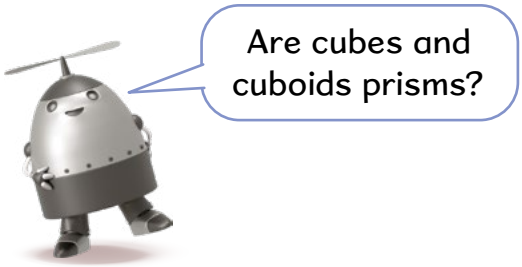

Let's Learn

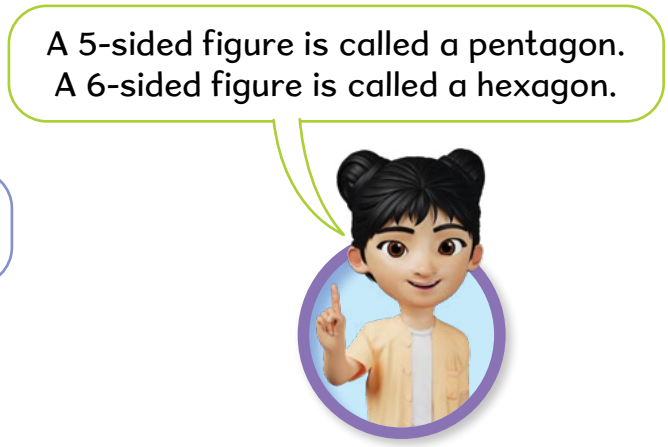

1 A **prism** has faces of the **same shape** and **size** at opposite ends.
The identical faces at opposite ends are **parallel** to each other.
The other faces that connect the faces at the opposite ends are **rectangular** in shape.

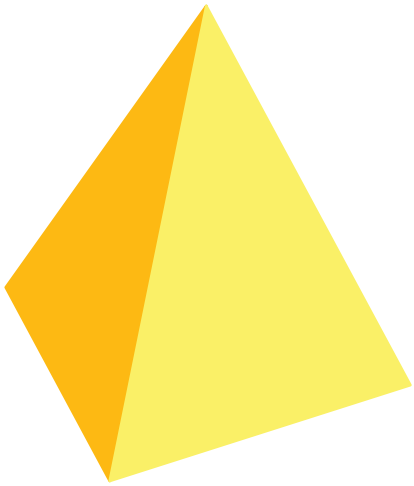

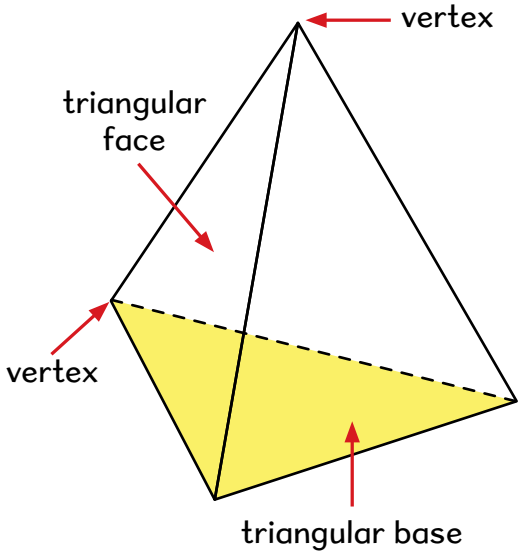

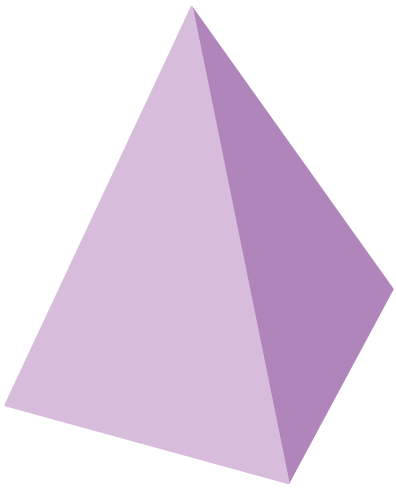

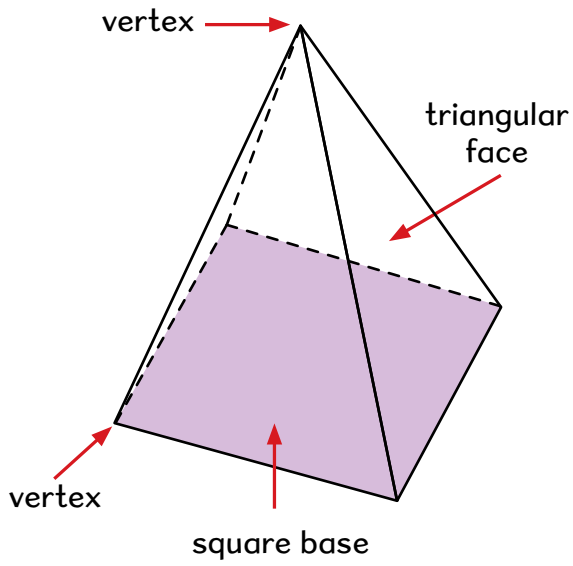

2 A **pyramid** has a **base** that can be of different shapes.
Its **triangular faces** meet at the **vertex**.

Maths Talk

Discuss in pairs.
What are these items? Where can they be found?
Are they prisms or pyramids?

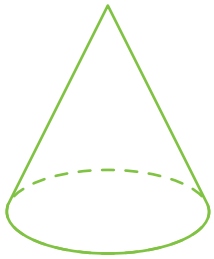

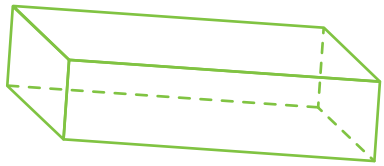

Let's Practise

Name the solid figures.

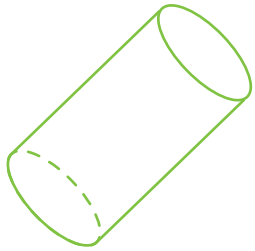

(a)

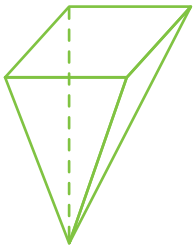

(b)

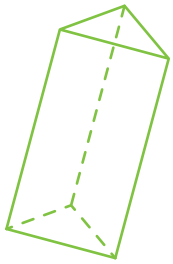

(c)

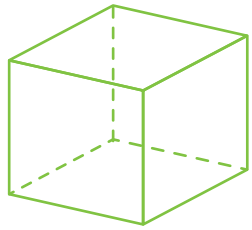

(d)

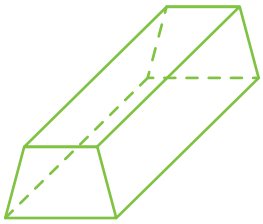

(e)

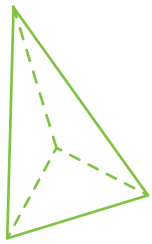

(f)

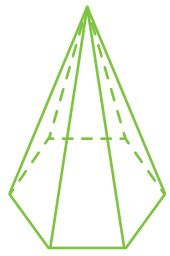

(g)

(h)

(i)

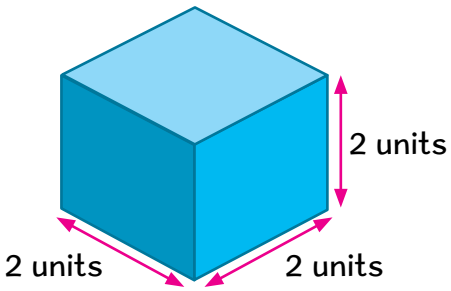

Drawing Geometric Figures

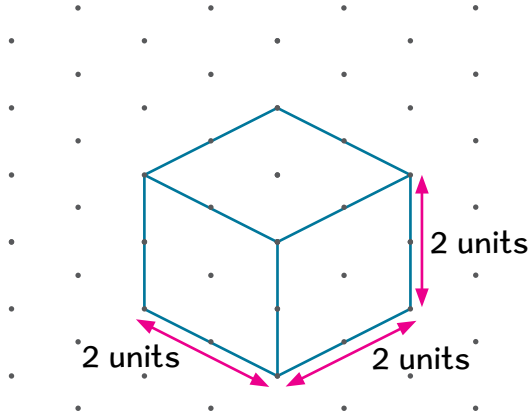

Let's Learn

1 Draw each solid figure on the isometric grid.

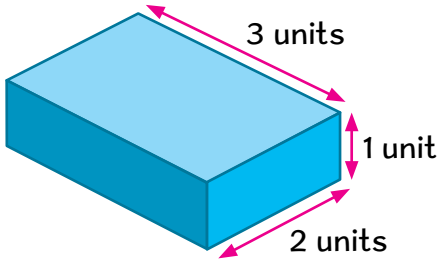

(a)

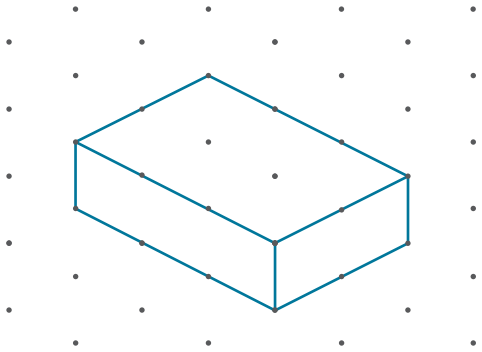

cube

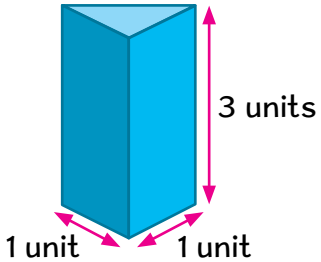

(b)

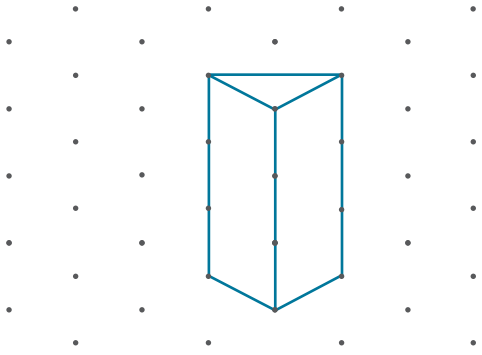

cuboid

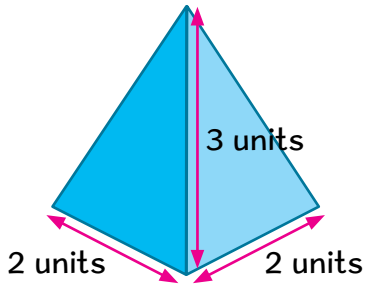

(c)

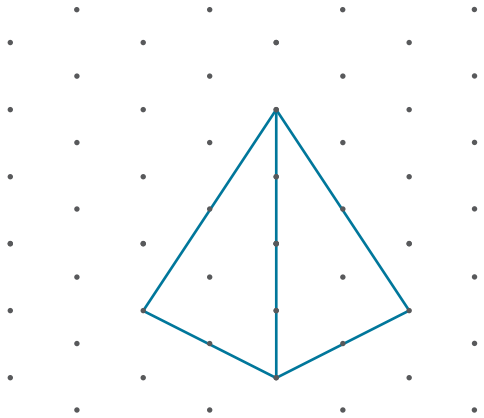

prism

(d)

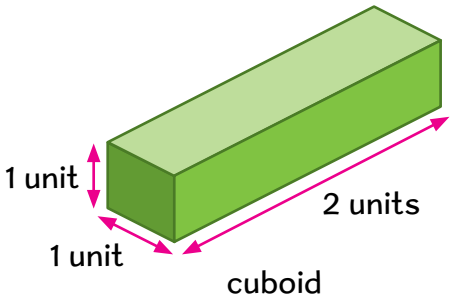

pyramid

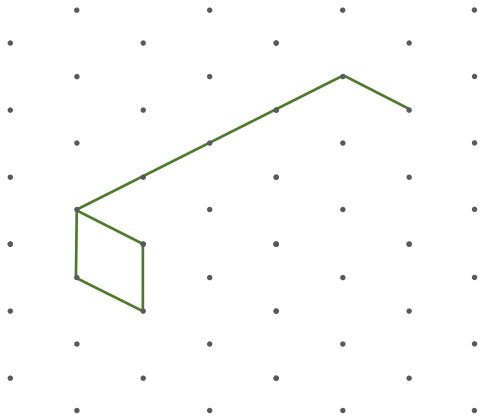

Let's Practise

1 Complete the drawing of each solid figure on the isometric grid.

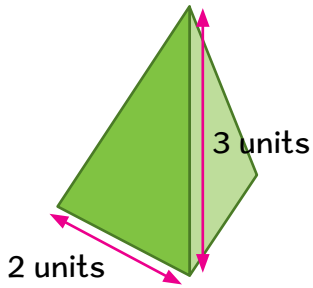

(a)

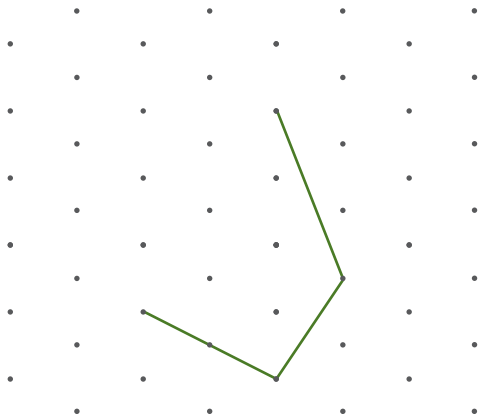

cuboid

(b)

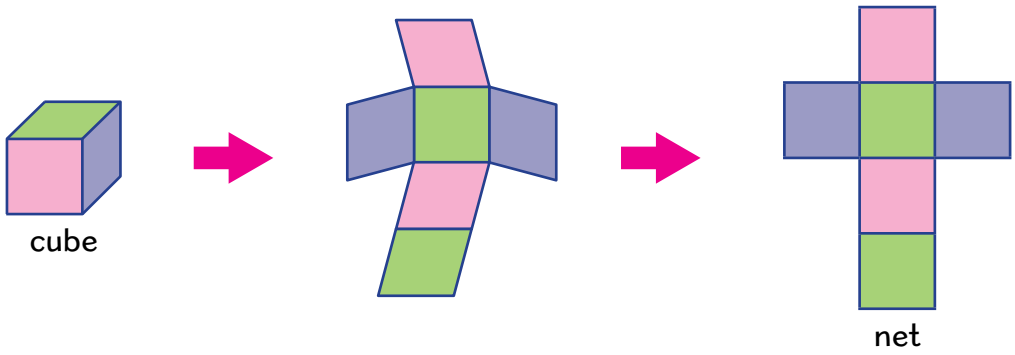

pyramid

Nets of Geometric Figures

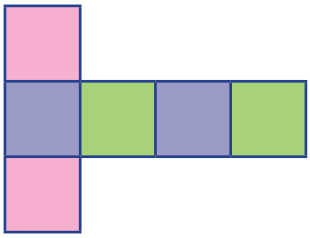

Let's Learn

1 When the faces of a cube are unfolded, the **net** of the cube is formed.

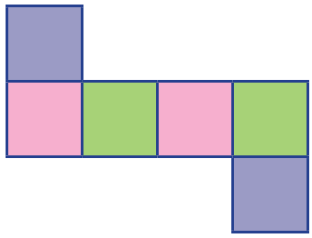

A **cube** has more than one net as shown below.

(a)

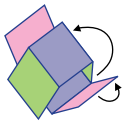

(b)

A net of a solid is a flat figure with faces that can be folded to form the solid.

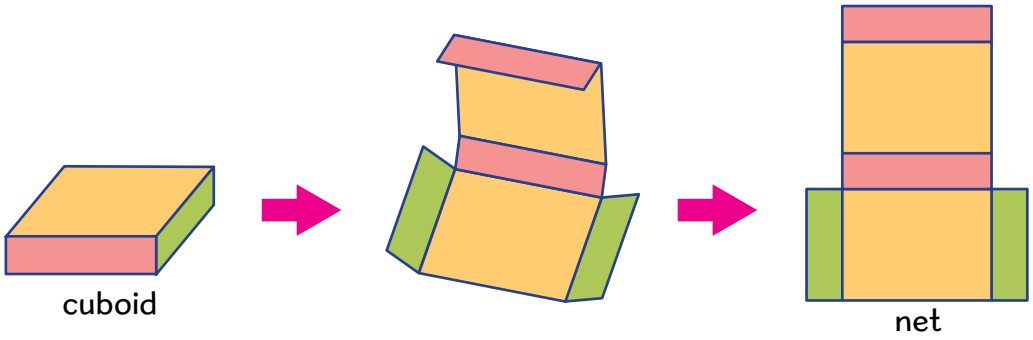

I can form a cube from its net.

What are other nets that can form a cube?

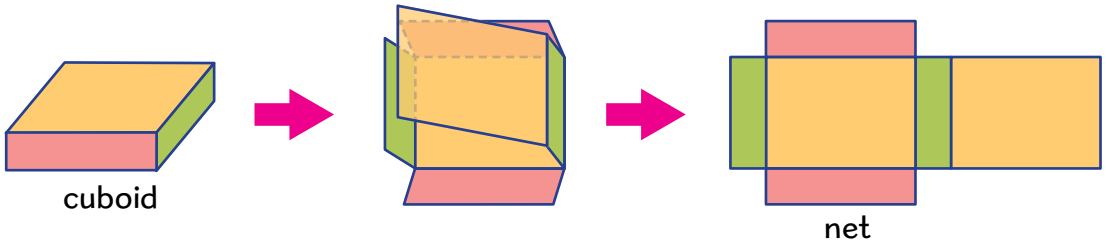

2 A **cuboid** also has more than one net.

(a)

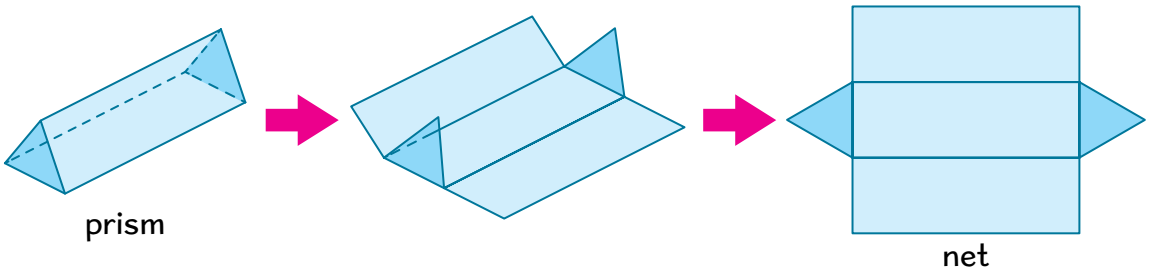

(b) Here is another example of a net for the same cuboid.

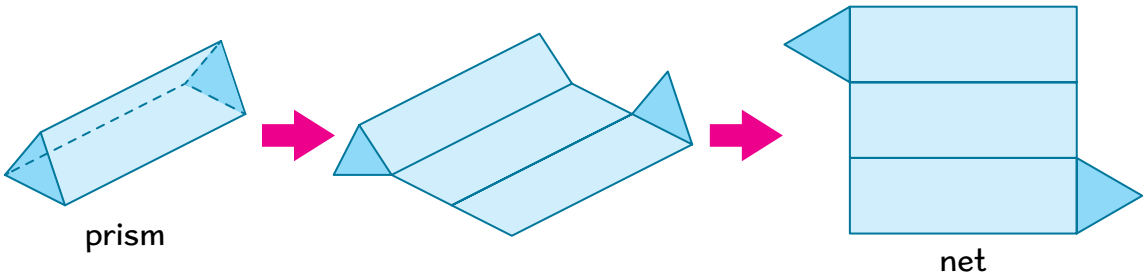

3 A **prism** can have more than one net.

(a)

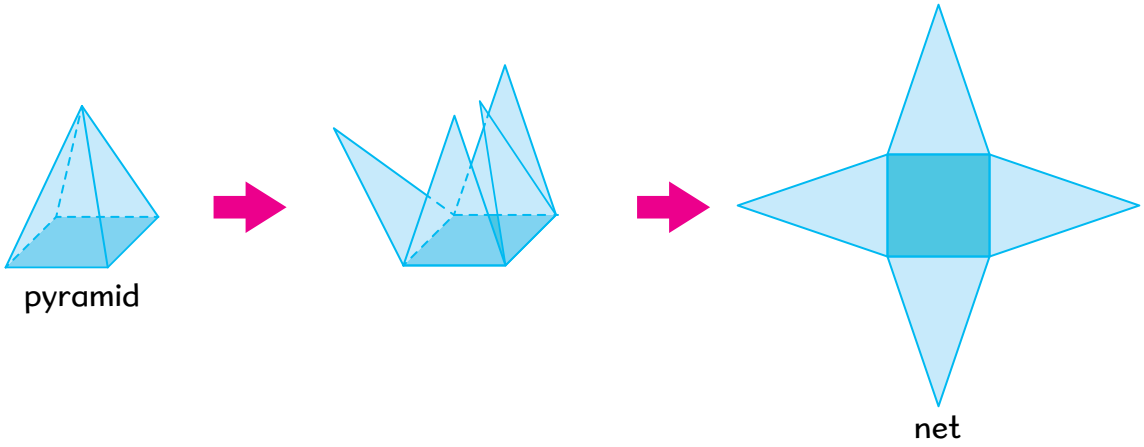

(b)

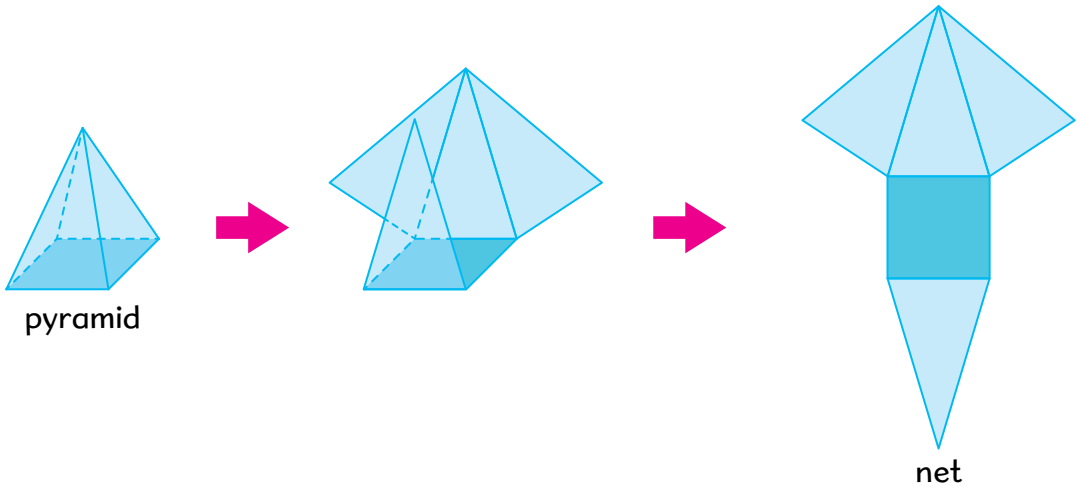

4 A **pyramid** can have more than one net.

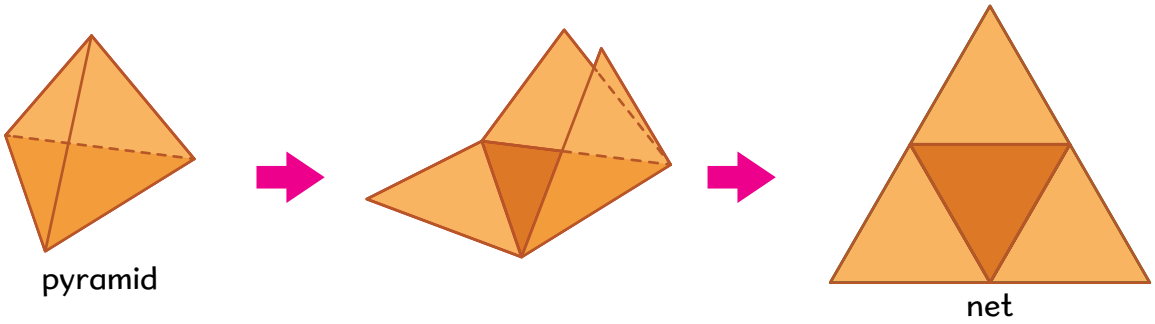

(a)

(b) Here is another example of a net for the same pyramid.

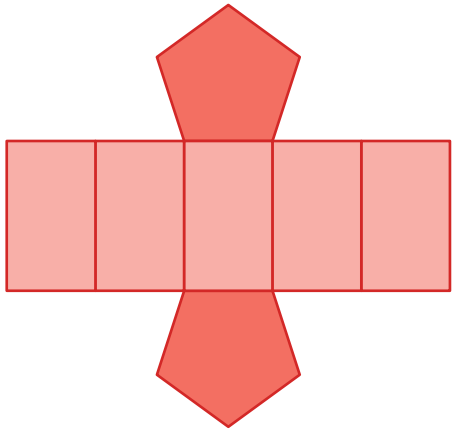

5 Here is an example of a net for another pyramid.

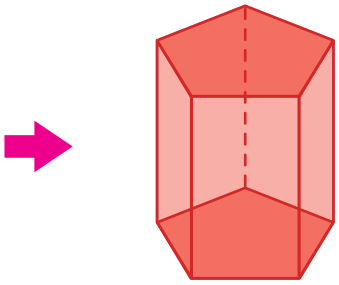

6 Identify the solid based on the given net.

(a)

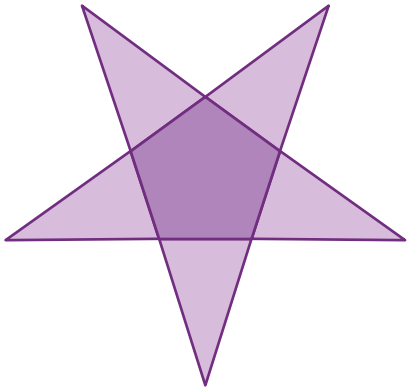

net

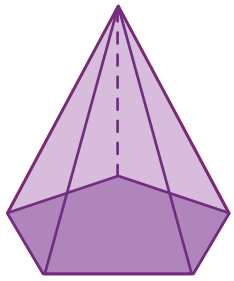

prism

(b)

net

pyramid

Hands-on Activity

Work in groups.
Make the following solid figures using geoshapes.

(a) cube
(b) cuboid
(c) prism
(d) pyramid

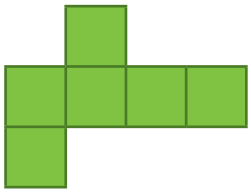

Let's Practise

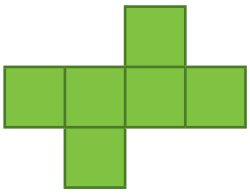

1 **(a)** Which of the following are nets of the cube shown below?
(b) Explain why the others are **not** nets of a cube.

cube

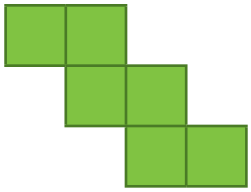

A

Y

Z

Mathematics Around Us

Some families make rice dumplings, which are traditionally eaten by the Chinese to celebrate the Dragon Boat Festival.

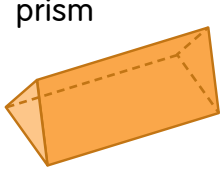

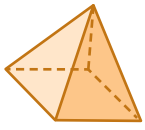

(a) Does the rice dumpling in the photo look like a prism or a pyramid? Why?

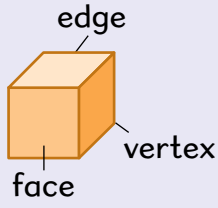

(b) What are some other objects that have the same shape as the rice dumpling shown?

Thinking Aloud

1 Work in groups.
Each group will receive the following solid figures: cube, cuboid, prism and pyramid. Use them to find the number of faces, vertices and edges for each shape.

3D-figure	Number of faces (F)	Number of vertices (V)	Number of edges (E)	F + V – E
(a) cube 				
(b) cuboid 				
(c) prism 				
(d) pyramid 				

In the last column, find the **sum** of **Number of faces** and **Number of vertices**.
Then subtract **Number of edges** from the **sum**.
What do you notice?

2 Derrick says that Figure A and Figure B are nets of a cuboid.

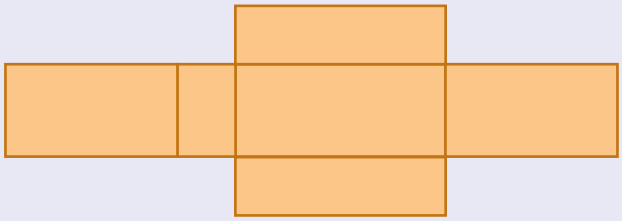

Figure A

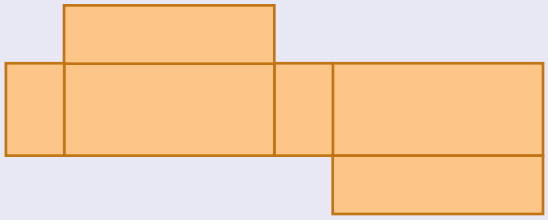

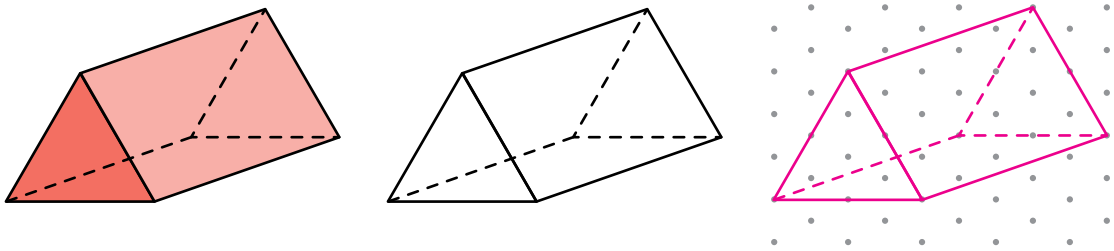

Figure B

Do you agree with him? Explain.

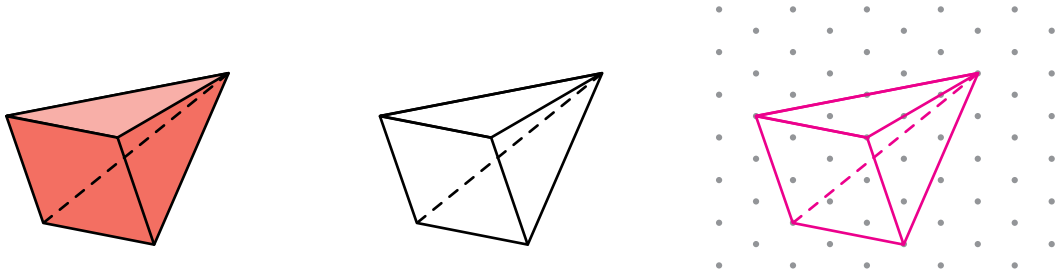

What Have I Learnt?

1 **Geometric figures.**

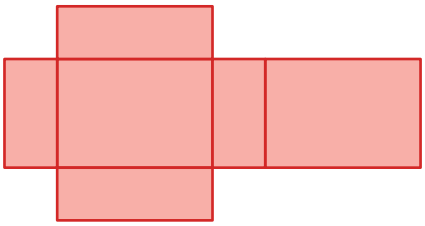

(a) A **prism** has flat faces of the same shape and size at opposite ends that are parallel to each other.

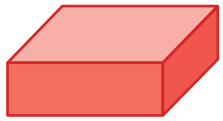

(b) A **pyramid** has a flat base and triangular faces that meet at a vertex.

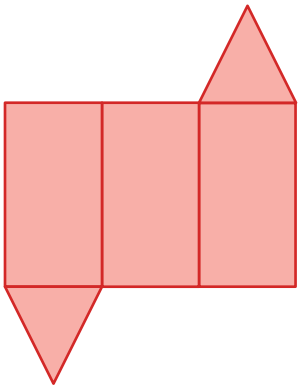

A **net** of a solid is a flat figure with faces that can be folded to form the solid.
