

To give students access to a Book, you must assign the Book to your class. There are two ways to add a Book to your class:

Method 1: Add a Book from the Classes Page (recommended when adding multiple Books)

Method 2: Add a Book from the Library (ideal for adding a single Book at a time)

Important Reminders:

- In the platform, videos are also referred to as “Books”.
- When a Textbook, Workbook, or Video is added to a class, all students in that class roster will automatically receive access to that resource in their Library.
- Tests are not available in the student Library. Students may only access Tests as assignments.
- Teacher Guides are teacher-only resources and cannot be accessed by students or parents.
